

150th Avenue SE and SE 43rd Street

\$165,000

This project would evaluate the intersection of 150th Avenue SE and SE 43rd Street for potential pedestrian safety enhancements, such as curb bulb-outs, a median island, or rectangular rapid flashing beacons. If selected, the enhancement(s) would be made based on engineering judgement, and in alignment with the City of Bellevue crosswalk program policies.
